WORK EXPERIENCE

GRADUATE/JUNIOR IOS DEVELOPER

Absa Group via The Digital Academy, April 2023 - March 2024

- Collaborated with cross-functional teams to develop and implement mobile applications using Kotlin for Android and Swift for iOS platforms.
- Conducted code reviews and provided constructive feedback to improve code quality and maintainability.
- Brainstorming and participating in digital projects.
- Participated in Agile development processes, including sprint planning, daily stand-ups, and retrospectives.
- Play a role in the development lifecycle of the Absa banking mobile application, contributing to frontend components.
- Conduct thorough testing, including unit tests to identify and resolve bugs and ensure the stability of the application.
- Actively participate in code reviews, providing constructive feedback to team members and adhering to coding standards and best practices.

Projects

AgriFund - Farming App

- Developed a bookkeeping application for small-scale farmers using Swift for iOS.
- Implemented features for capturing income and expenses, generating reports and uploading receipts and invoices all to be used as a financial record when applying for business funding at financial institutions.

Clothing Avenue - eCommerce App

- Delivered a feature-rich, user-centric eCommerce clothing app that leverages RESTful API technology to provide a seamless and personalised shopping experience for users while offering scalability and flexibility for future enhancements and integrations.
